

# Federal Election 2019 and Labor What price Human Life?

- We already live in a country in which the act of abortion i.e. the killing of a child in the womb, is freely available.
- We already live in a country in which unborn babies in most states, and territories can be killed up to birth!
- We already live in a country where our taxes – whether we like it or not – are used to pay for the killing of children in the womb.
- Yet – LABOR wants more not less abortions!
- Right to Life Australia is non-denominational and non-party political. However we can no longer sit back and behave in a non-political way in the wake of the article below published in the Melbourne Age, 6/3/19.

Judith Ireland  
THE AGE, 6/3/19.

# Labor Women and Abortion

- Deputy Labor leader Tanya Plibersek and Labor health spokesperson Catherine King said if Labor was elected Commonwealth-state funding agreements
  - *“will expect termination services to be provided consistently in public hospitals”*
- A spokesperson for Ms King said “We’ll work through everything with the states and territories and local health districts to make sure our public health system offers all Australian women access to safe, legal termination services if they need them.”\*\*
- “Under its National Sexual and Reproductive Health Strategy, Labor says it would review that the Medicare rebate associated with medical terminations ‘to address access and affordability issues.’\* ”
- The overwhelming majority of Labor women MPs or Labor women candidates are on EMILY’s List which requires them to vote in Parliament for abortion.
- Labor boasts of more women in Parliament – women who favour the killing of an innocent child in the womb because it is unwanted!

# Is abortion good for women?

## NO!

Just ask those women who contact our office or Pregnancy Counselling Australia telling of their post abortion grief!

Living in an abortion culture means more not less victims of abortion grief – to say nothing of the demise of many hapless children in the womb.

### HELP IS AVAILABLE:

**Help is available for women facing an unplanned pregnancy  
(Pregnancy Counselling Australia 1300 737 732)**

**but only as much as we and other prolife groups can afford.**

**This is unlike our governments (eg Victoria) who can expensively  
advertise and help women to access abortion.**

A report in The Australian newspaper (8/4/19) told of the gruesome way in which a newly born baby in Queensland was brutally killed immediately after birth because her birth was a social embarrassment. The child's father was jailed.

**Not so a doctor who kills a child in the womb. The government will pay the doctor a handsome fee.**

We live in a society required by law to value and protect life.

Yet when it comes to a child in the womb - a child that is lying there, trustingly living and growing until birth, why is it that concern for this human child disappears?

**If that child loses his/her life in a tragic accident after 20 weeks of pregnancy, he or she is part of the road toll. Yet the careless driver who killed the child in the womb, faces no criminal proceedings and no penalty.**

# Is a Vote for Labor a Vote for Life?

# Definitely NOT!

**Undoubtedly the Australian Labor Party – since its inception - has worked hard to improve the standard of living of many Australians. In my many years of lobbying members of Parliament I have met many fine Labor MPs. Sadly – this has changed over the years.**

- \* Labor now engages in Social Engineering with scant regard for human life.**
- \* Labor candidate for Bennelong (NSW) is Dr Brian Owler - Sydney neurosurgeon - who played a major role in the implementation of euthanasia legislation in Victoria in 2017 – despite the overwhelming majority of Australian doctors being opposed to it.**
- \* If he wins Bennelong – he may well be the Federal Health Minister in charge of Medicare!**
